## Early detection saves lives.

**For women aged 50-74, having a breast screen every 2 years is the best way to find breast cancer early.**

Screening with BreastScreen NSW is for women with no symptoms. If you are experiencing symptoms such as a lump, nipple discharge or persistent new breast pain, please see your doctor without delay.

Women aged 40-49 and over 75 are also eligible to attend. However, speak to your doctor to see if it is a priority for you.

**Call 13 20 50 to book your free breast screen or  
book online via [book.breastscreen.nsw.gov.au](https://book.breastscreen.nsw.gov.au).**
